Memory Upgrades for Desktops, Servers, & Notebooks

Total Micro offers over 12,000 memory upgrades and support for every major brand of computer. Using only the finest components, Total Micro's memory products are manufactured with state of the art Surface Mount Technology (SMT) systems, and each product must then pass our 100% quality audit program including complete parametric and performance testing. This attention to detail through every phase of our manufacturing ensures that our customers will always receive products that meet or exceed their expectations for performance and reliability.

Total Micro builds memory modules to upgrade virtually every major desktop, server or notebook computer including systems from:
